

SAVANNA MORRIS

GTM Strategy & Product Marketing · Enterprise AI & B2B SaaS · D1 Athlete
McLean/Tyson, VA / Remote · (773) 680-0108 · Savmor099@gmail.com · [LinkedIn](#)

PROFESSIONAL EXPERIENCE

AI Systems Architect — LLM Alignment & Prompt Engineering · *Data Annotation Tech* Apr 2026 – Present

- ▶ **Earned a top 2% selection** out of a global applicant pool — to design/stress-test large language model architectures at scale.
- ▶ **Built multi-turn adversarial prompt systems** that deliberately surfaced edge-case reasoning failures in LLMs, constructing behavioral constraint frameworks that measurably improved model accuracy and safety guardrails in production.
- ▶ **Validated complex LLM outputs directly against API endpoints**, evaluating reasoning paths under adversarial conditions to ensure consistent, production-ready performance across high-stakes automated pipelines.

Business Development and Product Design Intern · *Go Make a Difference Ventures* May – Jun 2026

- ▶ **Self-taught SwiftUI** and translated an existing **HTML codebase into a native iOS application** using Xcode, contributing to the development of an early-stage mobile and web application prototype using Claude, Codex, and Cursor.
- ▶ **Created a multi-step AI prompting strategy** to refactor and optimize code with Claude while preserving the existing application architecture and integrating Claude Babel into the Xcode development workflow.
- ▶ **Designed/developed potential prototype features**, incl. user onboarding, memory storage, and synthetic data capabilities.
- ▶ **Refined the application's UI/UX by troubleshooting issues**, improving prototype functionality.
- ▶ **Developed early-stage GTM planning**, market entry strategy, and FY1–FY3 financial modeling.
- ▶ **Researched and drafted recommendations** for an AI privacy policy and intellectual property framework to support responsible AI implementation and protection of company assets.

Marketing and Global Communications Intern · *Cloudera Inc.* Jun – Aug 2025

- ▶ **Vetted a new enterprise communications platform leading to secured executive adoption** — the switch unlocked AI-enabled language translations, global audience segmentation, and advanced analytics visibility, enabling Cloudera to scale its newsletter strategy internationally across 2,800+ employees.
- ▶ **Compiled all three components** — GTM strategy, engagement analytics, and vendor recommendation — into a single executive deck delivered to manager for CMO presentation. Slated to present directly but internship concluded before meeting.
- ▶ **Drove and maintained a 72% open rate across global newsletters**, exceeding industry benchmarks — a direct result of the platform migration, improved audience segmentation strategy, and data-driven content optimization.
- ▶ **Built the GTM infrastructure for an entire vertical from scratch**: competitive battlecards, buyer persona decks, and a unified positioning framework for the Media & Entertainment segment, adopted across the full global sales and marketing org.
- ▶ **Operated as the sole communications bridge** between Cloudera's senior leadership and external vendor teams across 5+ executive stakeholders — accelerating procurement timelines and eliminating bottlenecks in a multi-party enterprise deal.

LEADERSHIP & HIGH-PERFORMANCE EXPERIENCE

Division I Track & Field Athlete · *Pepperdine University (NCAA)* Aug 2023 – Mar 2025

- ▶ **Independently negotiated and executed a commercial NIL partnership** with national apparel brand The Perfect Jean — managed contract compliance, digital asset production, and multi-channel campaign deployment with zero organizational support.

Recording Artist · *WAVES WORSHIP / Independent* Jan 2023 – Present

- ▶ **Scaled to 3,100+ followers** by applying B2B GTM principles — audience segmentation, organic growth loops, and performance analytics — to an independent creative product lifecycle.

EDUCATION & GLOBAL EXPERIENCE

Pepperdine University · BS Business Administration · Minor: Songwriting · GPA: 3.6 · Dean's Honor List Exp. April 2027

- ▶ **Highly competitive international practicums**: Florence, Italy · Tokyo, Japan · Buenos Aires, Argentina — macroeconomic policy, cross-cultural trade strategy, and localized market entry frameworks.

TECHNICAL SKILLS

GTM & Product: Go-To-Market Strategy · Product Positioning · Competitive Battlecards · Buyer Persona Development · Market Research · Customer Segmentation

AI & Technical: LLM System Design · Adversarial Prompt Engineering · Constraint Architecture · API Testing · Pandas · GitHub

Data & Analytics: Excel (Advanced) · Automated Dashboard Design · Heat Mapping · CTR & Engagement Optimization

Enterprise: CMO-Level Presentation · Executive Stakeholder Management · B2B Vendor Negotiation · Cross-Functional Alignment

Languages: English (Native) · Spanish (Professional Working) · Korean (Advanced/Intermediate)
