WHO ARE WE?

Our Goal: To help companies enable consumers to taste their services to the full.

WHO ARE WE?

*"We are a group of **data-driven**, high-performance **consultants** dedicated to helping companies like Rappi grow and expand their services through passion, innovation, and collaboration."*

DATA-DRIVEN

CONSULTANTS

**GROWTH
PARTNERS**

COMPANY OVERVIEW

SLIDE 5

Founders

Simón Borrero (CEO), Sebastián Mejía, and Felipe Villamarín

Founded in 2015

Valuation

~2 Billion

2021 Valuation was 5.5B

What is Rappi?

- Latin American **super app**
- **Multi-service** platform
- **Logistics-tech** company
- **Three-sided** marketplace
- **Data-driven** commerce layer

MARKET PRESENCE

SLIDE 6

The Countries

- **Colombia:** ~15–25%
- **Mexico:** ~30–40%
- **Brazil:** ~20–30%
- **Argentina:** ~5–10%
- **Chile:** ~3–5%
- **Peru:** ~3–5%
- **Uruguay:** ~1–2%
- **Ecuador:** ~2–4%
- **Costa Rica:** ~1–3%

Rappi doesn't just deliver fast, it owns the infrastructure and data systems that make ultra-fast delivery scalable.

Rappi Turbo

- 10-minute delivery via dark store network
- Hyper-local warehouse placement strategy
- Optimized picking & fulfillment processes
- Integrated last-mile logistics system

Source: Jabora & Laya

A graphic with a light green background. At the top, it says 'Rappi Turbo' in a red and black script font. Below that, '10 min' is written in a large, bold, dark green sans-serif font. At the bottom, '¿Cómo funciona?' is written in a dark green sans-serif font.

Rappi Turbo
10 min
¿Cómo funciona?

Rappi doesn't just deliver fast, it owns the infrastructure and data systems that make ultra-fast delivery scalable.

Inventory & Prediction System

- Real-time inventory synchronization
- Demand prediction by location
- Algorithmic order-routing & driver matching
- Dynamic product assortment optimization

A RESTAURANT REVIEW

SLIDE 9

What Suppliers Think

01 Rincon Norteno

Interviewee: Maria, employee at Rincon Norteno.

Date: 4/14/26

"I have been working here for just over two years, and I have loved every bit of it!"

02 Their Takeaway

- Maria described Rappi as both operationally demanding and commercially valuable.
- **Takeaway:** Rappi increases order volume, but it also creates pressure on restaurant workflow.

AI USE OPPORTUNITY

How Rappi can leverage AI to dominate Latin America's next decade

SLIDE 10

\$44B

Projected Latin American AI market by 2030

Compound Annual Growth Rate of 24%, fastest-growing AI region in the Western Hemisphere.
Rappi at intersection of delivery, fintech, and commerce → positioned to capture this.

Source: Statista Global AI Market Report 2024, J.P. Morgan Emerging Markets Research

72%

Mobile-First Users

AI-native UX is already how Rappi's base operates

3.2×

Higher Lifetime Value

For AI-personalized users vs. non-personalized (est.)

\$1.3B

SoftBank AI Allocation

Earmarked specifically for LatAm tech investments in 2024

10 min

Rappi Turbo Target

Only achievable at scale through AI dispatch & dark stores

AI USE OPPORTUNITY CONT.

SLIDE 11

Rappi's three core AI capabilities — 2 of 3

**18%
higher**

Average Basket Size

Hyper-Personalization Engine

AI models trained on Rappi's 500M+ annual orders predict before user usage. Algorithm learns ind. behavior patterns: morning weekday orders, orders with rain, reorders every 3 days → surfaces options proactively.

Source:

*McKinsey Digital, 2024 —
Personalization benchmarks for
on-demand commerce platforms*

22% faster

Average Delivery Time

Last-Mile Route Intelligence

Machine learning models optimize delivery routes in real time: traffic, driver location, order volume, and neighborhood density simultaneously. No human dispatcher could process this at scale.

— AI logistics savings; Rappi
Turbo operational data*

AI USE OPPORTUNITY CONT.

SLIDE 12

The competitive window — and why Rappi must move now — 3 of 3

RAPPI'S AI WINDOW

NOW →

Rappi holds the AI advantage, dark stores, routing, personalization built under pressure

1-2 YR

iFood deploys \$200M+ AI investment. Closes gap in Brazil, begins expansion north

\$200M+

iFood (Brazil)

AI logistics investment. Holds 80% of Brazil, LatAm's biggest market. If they scale north with AI → biggest threat Rappi faces.

Source: Delivery Hero Annual Report 2024

\$200M+

Uber Eats (Global)

Already pushed out of Peru by Rappi. But a rebuilt UberEats backed by global AI at full scale is fundamentally different competitor.

Source: Uber Technologies Annual Report 2024

The IPO Implication →

Rappi must raise capital now, before iFood and Uber Eats close the AI gap. The IPO isn't just a financial event. It's the move that funds Rappi's window to stay ahead.

HOW DID ARGENTINA MAKE RAPPI STRONGER GLOBALLY?

Economic Resilience

Rappi's strategic pivot to Turbo as a response to economic volatility.

- 2023/24 Inflation spikes → shift from food delivery to perfect Turbo strategy
- Built > 500 micro warehouses for users to buy only what they needed for the day
- Success in AR proved to other investors (SoftBank) that Rappi's SuperApp model works in currency devaluation
- Maintained 37% YoY growth in volatile market → de-risks company for future IPO
 - \$856M in revenue

Source: Web Retail, Sacra Report (Updated March 2026)

THE ARGENTINE PIVOT CONT.

Strategic Analysis

SLIDE 13B

HOW DID ARGENTINA MAKE RAPPI STRONGER GLOBALLY?

High Digital Maturity

Argentina's tech-savvy base as a catalyst for global scaling.

- Argentina has highest digital penetration rates in LatAm (90%)
- Account for around 23% of Rappi's total global web traffic (not same as total app usage) → ranked #3 most important market by user engagement
- High tech usage = growth in FinTech (RappiPay) and Turbo features before global rollout

Sources: DataReportal (2025), Similarweb, Sacra Research, International Trade Administration

HOW DID ARGENTINA MAKE RAPPI STRONGER GLOBALLY?

Talent and Hub

How tech excellence in Argentina fuels Rappi's global engine.

- Tech hub → Argentina has large talent pool → Rappi looks for Argentinians with Engineering and Leadership talent
- Core product updates tested/developed by Argentinians
- Being home country to Mercado Libre forced faster product and execution discipline.

Source: Clarín (Economy Section), Lupa Hire (2026 Recruitment Analysis), Rappi Tech Blog, Sacra Research

STRATEGIC CAPABILITIES

SLIDE 14

What Argentina built that no competitor could buy — Part 1 of 2

Instant Cash Flow Model

Rappi receives revenue instant order is placed (most companies = 30-90 days).

- Payment is immediate, predictable, and convertible to dollars daily.

For investors evaluating IPO, most attractive structural feature a delivery company has:

- **No** accounts receivable, credit risk, and working capital shortfall; business funds itself.

Source: Mauricio C., Former UBS Global Markets Analyst & Equities Trader

Lean Contractor Structure

Rappi's network = Uber: drivers are independent contractors, not employees.

- **No** 401(k) liability, healthcare cost, fixed headcount, and severance obligation.

Keeps operating costs razor-thin at scale.

- New market expansion: cost base grows as fast as order volume – advantage when pitching profitability to public market investors.

Source: Mauricio C., Former UBS Global Markets Analyst — 'It's like Uber. The drivers don't work for Rappi.'

STRATEGIC CAPABILITIES CONT.

SLIDE 14B

What Argentina built that no competitor could buy — Part 2 of 2

Pan-LatAm Political Risk Dilution

Single-country competitors → catastrophic downside if one government = hostile.

- Peru's Credit Corp (Peru, Colombia, and Bolivia) could lose 40%+ of stock value if one of those countries has political upheaval.

Rappi's 9-country footprint changes this.

- To threaten Rappi's business, need Latin American continent to collapse → separates Rappi from every regional competitor.

Source: M.C., UBS — "You would need the entire South America to go down. It's a more diluted risk."

"How does Rappi meet global ESG standards?"

Local Identity

- **Algorithms prioritize local restaurants** → Community trust (global only competitors can't match).
- **2025/26:** micro-influencer campaigns – local voices for unique neighborhood culture.
- **Unbanked populations:** RappiPay developed to bridge gap; local users → global services.
- **Turbo model:** AI-driven demand prediction to stock dark stores with specific neighborhood needs.
- **Matrix Structure:** Each country has own GM w/authority to change strats on local economic shifts.
- **Look for elite talent in hubs like AR;** people who contribute to Rappi are same as locals who use it.

ESG and Governance

- **Decarbonization of Fleet: 2026:** e-bikes, LEVs. High-density hubs (Bogotá, Mexico City, BA) → robots/drones decrease emissions. 40% deliv. → 0 emission vehicles.
- **Restaurants:** biodegradable/recyclable packaging. **2025:** implemented a no labels/no plastics filter
- **Rider welfare and labor regulation:** workers → financial services (RappiPay)/education. **2026:** formalized Safety & Wellbeing standards = insurance, specialized rest zones in major cities → 600,000 couriers use
- **Regulatory Compliance: IFRS S1/S2** global disclosure standards = baseline 2025 climate financial reporting. ESG claims: audit-ready for int. investors.
- **Data Privacy & AI Ethics:** Algorithms for orders and delivery fees transparent; no discrimination.

MARKET OPPORTUNITY

Where does Rappi stand?

SLIDE 16

MAJOR DIRECT COMPETITORS

PedidosYa

- **Status: Private. Delivery Hero SE (\$DHER).**
- **Role:** Leading "Quick E-Commerce" in Southern Cone (AR, Chile, Uruguay). / faster niche service, a different subscription model, more varied "courier" service

iFood

- **Status: Private.** Majority-owned by **Prosus**.
- **Market Position:** Holds **80%+ monopoly** in Brazil.
- **Competitive Edge:** Synonym for food delivery in region's largest economy./ but only in Brazil

Mercado Libre (\$MELI)

- **Status: Public (NASDAQ).**
- **Role:** Amazon of LatAm. Rappi's biggest threat in **Q-Commerce**.
- **Update:** Amazon partnered with Rappi (2025/2026) to leverage Rappi's logistics to compete against Mercado Libre's dominance.

Uber Eats (\$UBER)

- **Status: Public (NYSE).**
- **Market Share:** Estimated **7–10%** of the total LatAm market.
- **Focus:** High-margin advertising and "Uber One" subscriptions → loyalty over volume

RAPPI MARKET DOMINANCE

20%

share of LatAm's \$80B+ Food & Quick-Commerce Market."

Positioned as the leading local champion across the region

Sources: Prosus FY26 Shareholder Reports; Delivery Hero Investor Relations; Bloomberg (Sept '25); Sensor Tower Market Analysis (Q1 '26).

“Rappi is looking to expand further and compete with rivals such as PedidosYa.” — Matias Salamone (VP of Engineering at Rappi)

IPO TIMELINE

SLIDE 17

FINANCIAL OUTLOOK

SLIDE 19

IPO Valuation & Comparable Company Analysis — 1 of 2

\$1.8B

Current Valuation

Down from \$5.5B peak in 2021

~\$3–5B

Target IPO Range

Based on MELI & DASH comps

37%

YoY Growth in Argentina

During peak inflation

9

Countries Operating

Only pan-LatAm super-app

COMPARABLE COMPANY ANALYSIS

Company	Exchange	Valuation	Why It Matters for Rappi
Mercado Libre (MELI)	NASDAQ	~\$95B	Best LatAm tech comp — pan-regional platform, similar investor profile
DoorDash (DASH)	NYSE	~\$20B	US delivery comp — pure-play benchmark, but no fintech or pan-LatAm moat
Grab Holdings	NASDAQ	~\$14B	SE Asia super-app — closest structural parallel to Rappi globally
Rappi (Target)	NASDAQ	\$3–5B	Premium over DASH justified by fintech layer, 9-country moat

Sources: Bloomberg, Morningstar, Reuters (Sept 2024), J.P. Morgan IPO Guide, Investopedia

FINANCIAL OUTLOOK CONT.

SLIDE 19B

The Valuation Story & Why the Timing Is Right — 2 of 2

WHY DID VALUATION DROP \$5.5B → \$1.8B?

2022: rising interest rates → crushed tech stock globally.

- DoorDash: \$72B → \$16B
- Grab Holdings: \$40B → \$10B
- Delivery Hero: \$47B → \$6B

Rappi moved w/sector. Business, order volume, market share, product expansion, still grew.

Investors: current \$1.8B valuation = discount to intrinsic value, not deteriorating business.

WHY LIST NOW — NOT IN 2 YEARS?

→ Cofounder Signal

Rappi cofounder Sebastián: Company could be IPO-ready in 12 months, Reuters, September 2024.

→ Argentina Stabilizing

Milei's reforms → triple-digit inflation down, lifting currency controls → Key risk market is improving.

→ SoftBank Needs Exit

SoftBank invested \$1B+ in 2019. After 5+ years, fund → liquidity event. IPO serves Rappi and lead backer.

→ AI Moat Window Is Closing

iFood/UberEats: \$200M+ on AI logistics. Rappi's competitive window for AI: 2–3 years before parity closes.

HAVANNA Example

SLIDE 20

01 Havanna IPO Example (2016)

- Raised ~\$11M via IPO
- Funded new production facility
- Timed during strong investor demand

02 Martin Zalazar

- Used money from the IPO to provide the capital to expand to new markets
- This allowed them to expand their supply chain and production significantly

HAVANNA

**Recommendation: Use
post-IPO capital to pilot entry
into Panama City, Panama.**

WHY PANAMA CITY?

SLIDE 22

High Purchasing Power

- Panama has one of the highest GDPs per capita in LatAm.
- Rappi's high-margin services (RappiPay, RappiTravel) thrive in places w/disposable income.

"Dollarized" Advantage

- Panama uses USD.
- For investors = a huge "de-risking" factor → Rappi could earn revenue in a stable currency, helping to offset volatility in Argentina.

Urban Density

- Most country economic activity in Panama City.
- Rappi is most profitable when it can achieve "hyper-density", lots of orders in a small, skyscraper-heavy area.
- *"Rappi focuses on major hubs."* – Matias Salamone

Panama City, Panama

<i>Feature</i>	<i>PedidosYa (60%)</i>	<i>Uber Eats (20%)</i>	<i>Rappi's Niche</i>
Fintech	Basic payments	No banking	RappiPay (Panama is a banking hub!)
Travel	None	Limited	RappiTravel (Hub of the Americas)
Super App	Mostly Food/Grocery	Logistics focused	The "Everything" App

KEY LESSONS

SLIDE 24

What Rappi teaches every startup that wants to go global — 1 of 2

01 Constraints Build Capability

Argentina's hyperinflation, currency controls, economic chaos → Rappi build financial infrastructure, AI routing systems, and operational discipline. **Every constraint → a capability.** Hardest market → stronger companies.

Source: Mauricio C., UBS — 'If there is a company that makes sense to IPO in Latin America, it's Rappi.'

02 Cash Flow Is King — Build For Instant Revenue

Model generates rev. moment order is placed: **no** credit terms, delayed payment cycles, inventory risk. Investors: instant cash flow = attractive structural feature a delivery company can have. Build business model around immediate payment.

Source: Mauricio C., UBS — 'Cash flow is probably the most talked about thing in finance for businesses. In Rappi, it's instant.'

KEY LESSONS CONT.

SLIDE 25

What Rappi teaches every startup that wants to go global — 2 of 2

03 Local Brands Beat Global Giants in LatAm

UberEats → Peru pushed out by Rappi. iFood 80% Brazil, struggles everywhere else. LatAm brand earns cultural trust → loyalty competitors can't replicate. LatAmericans want local brand — not global product.

Source: Mauricio C., UBS — 'Once they like something in LatAm, everybody just loves it. UberEats was in Peru and then they got taken out by Rappi.'

04 Spread Your Risk Across Markets From Day One

Single-country companies = **one** election, devaluation, political crisis from 40%+ stock drop. 9-countries → investors get full LatAm exposure w/o single-country risk. Building for scale, design geographic strategy to dilute political and currency risk.

Source: Mauricio C., UBS — 'You would need the entire South America to go down. It's a more diluted risk than just a different country.'

CONCLUSION

SLIDE 27

01 Argentina as a Strategic Advantage

- Challenging economic and digital conditions forced Rappi to build speed, resilience, and operational discipline
- Capabilities developed in Argentina became scalable strengths across Latin American markets

02 The IPO launchpad to Panama

- After launching the Rappi IPO we will be able to have the capital to grow operations and scale more to compete
- This will allow us to grow into the Panamanian market

Rappi

"The key to turning local identity into global success is..."

...building your company inside market everyone else is afraid of.

Rappi did not succeed despite Argentina, it succeeded because of it. The inflation, the currency chaos, the instability: these were not obstacles to work around. They were a curriculum. Every constraint became a capability. Every crisis became a competitive advantage that DoorDash, Uber Eats, and every Silicon Valley competitor never had to earn.
